What is UCMAS?

A World-Renowned Brain Development Programme

UCMAS (Universal Concept of Mental Arithmetic System) is a globally recognized brain development programme for children aged 4 to 13. Using the ancient abacus combined with modern neuroscience, UCMAS trains children to perform complex calculations entirely in their minds — faster than a calculator. Active in over 80 countries, UCMAS is trusted by millions of families worldwide.

How UCMAS Develops Your Child's Mind

Whole-Brain Activation

Activates both left and right brain hemispheres simultaneously for balanced cognitive growth.

Lightning Mental Speed

Children learn to perform multi-digit calculations in seconds without pen, paper or calculator.

Concentration & Focus

Regular abacus training sharpens attention spans and the ability to focus under pressure.

Photographic Memory

Visualizing the abacus in the mind builds exceptional memory and recall abilities.

Problem-Solving Skills

Develops logical, analytical thinking that transfers directly to all school subjects.

Confidence & Self-Esteem

Mastering difficult calculations builds pride, resilience and a love of learning.

✦ **Proven in 80+ Countries | Millions of Children Trained | Multiple World Champions** ✦

UCMAS students consistently outperform peers in Maths, Science and Language across all assessments.

Programme Levels & Schedule

Structured pathways from beginner to international champion

LEVEL 1 — BEGINNER

1

Abacus-Assisted Arithmetic

Children learn to use the physical abacus to perform addition, subtraction, multiplication and division. They build a solid mental picture of numbers and develop their first instincts for speed and accuracy.

LEVEL 2 — INTERMEDIATE

2

Mental Arithmetic

The physical abacus is set aside. Children now visualize the abacus in their minds, performing calculations purely through mental imagery. Speed and complexity increase progressively at each sub-level.

LEVEL 3 — ADVANCED

3

Flash Anzan

Numbers flash on screen for a fraction of a second. Students add, subtract and multiply series of numbers at extraordinary speed using only their mental abacus. This is the hallmark of elite UCMAS training.

LEVEL 4 — COMPETITION

4

International Championship Preparation

Top-performing students are prepared for local, national and international UCMAS competitions. SIS Saturday Klinik students have proudly represented Ghana on the global UCMAS stage.

■ Session Schedule

Day:	Every Saturday
Time:	8:00 AM – 12:00 PM
Duration:	4 hours per session
Venue:	SIS — West Hills Mall Area
Classes:	Small groups (max 15 students)

■ Enrolment & Fees

Registration:	Contact school for details
Monthly Fee:	Contact school for details
Materials:	Abacus kit provided
Assessments:	Included — every term
Competitions:	Selected students only

Why Choose SIS for UCMAS?

Your child deserves the very best start — and we deliver it every Saturday.

Internationally Certified Instructors

Our UCMAS coaches are fully certified and regularly trained by UCMAS International, ensuring your child receives world-class instruction right here in Accra.

Globally Recognized Programmed

UCMAS is accredited and active in 80+ countries. Your child's achievement is recognized worldwide — opening doors to international competitions and recognition.

Proven Academic Impact

Consistently record improvements in Maths and Science. Parents report better concentration, homework habits and classroom performance.

Supportive School Community

At SIS, UCMAS is more than a class — it is a community. Students cheer each other on, celebrate milestones together and develop lifelong friendships and values.

Enroll Your Child Today!

Spaces are limited. Register now to secure your child's place in the
Next UCMAS Saturday Klinik cohort at SIS.
